## What is “Co-education in Green”?

“Co-Education in Green” is a two-year Erasmus+ (KA2) project, aiming to empower adult educators in community education, giving emphasis on environmental and accessibility issues for people with disabilities. Thus, they will become leaders in their local communities and promote cooperative projects of transformation of shared spaces into greener and more accessible areas for all.

## Project Aims

- Reinforce adult educators competences on cooperative education and leadership skills
- Bettering adult educators knowledge on environmental-oriented education
- Strengthen the relationships of individuals within local communities and promoting values of social inclusion, sustainability and accessibility
- Fostering the cooperation and networking between organisations and associated partners active in the field of adult education on national and European level

## Target groups

- **adult educators**
- **educators working with adults with special needs**
- **adult education institutions, which provide courses for adults with special needs**
- **adult learners**
- **adult learners with disabilities or special needs**
- **education communities**
- **local, national and international entities active in the field of adult education**

## Project Outputs

### Interactive Database & Methodology

It will be a digital tool which will provide best practices and information on how to transform shared spaces into green environmentally friendly areas, through collaborative and inclusive processes. Partners will also develop a methodology for the creation of shared green spaces and implementation procedures.

### Online Training Kit

It will be addressed to adult educators, aiming in improving their professional's competences on leading environmental-oriented cooperative education, through the collaborative transformation of shared spaces into green accessible areas.

### Manual on how to create multisensory gardens

It will be addressed to adult educators and educational centers and it will provide information and guidelines for the required processes for the creation of accessible multisensory green gardens.
